web development

Web development enthusiast with a focus on full-stack technologies. Pursuing MCA and eager to contribute to real-world projects, build responsive applications, and grow professionally in a hands-on IT role.

PROJECTS

GlowMist – WordPress E-Commerce Store

- Built a WordPress e-commerce store (GlowMist) with WooCommerce, AI-generated products, and test-mode payments.
 - Designed a responsive theme with white–blue branding and modern typography.
- Link: <https://glowmist.great-site.net>

Gemini Document Project

- Integrated Gemini AI for document uploads, auto summaries, tagging, and Q&A.
- Debugged and optimized the workflow independently.
- GitHub link: <https://github.com/HarishC2003/AI-Powered-Collaborative-Knowledge-Hub-MERN-Gemini->

Shopify Store (Replica) – Shipez USA

- Created a replica of shipezusa.com using Shopify.
- Customized the theme, added products, and configured email notifications for orders.
